KEY INSIGHT

Seasonality Is Real

Volume spikes Oct–Jan (snowbird season: 1,600–1,900/mo) and drops to 390/mo in spring/summer. Content and ad spend should front-load Q4/Q1 to capture demand when it peaks.

02 — COMPETITOR PROFILES

03 — KEYWORD OPPORTUNITIES

Bottom-of-Funnel Keywords

Purchase-intent keywords where the searcher has already decided on the service and location. These map directly to money pages on a builder's website.

Core Service Keywords

KEYWORD	VOLUME	CPC	INTENT
home builder Sarasota	590/mo (DMA)	\$3.33	COMMERCIAL
new construction homes Sarasota	590/mo (DMA)	\$8.21	COMMERCIAL
custom home builder Sarasota	390/mo (DMA)	\$7.91	COMMERCIAL
new home builder Sarasota	320/mo (DMA)	\$8.10	COMMERCIAL
general contractor Sarasota	260/mo (DMA)	\$7.76	COMMERCIAL
luxury home builder Sarasota	170/mo (DMA)	\$7.63	COMMERCIAL
home builder near me	90/mo (DMA)	\$21.54	COMMERCIAL

Location Expansion Keywords

Adjacent markets within the Sarasota–Bradenton DMA. Each warrants a dedicated location page.

KEYWORD	VOLUME	CPC	COMPETITION
new construction Lakewood Ranch	390/mo	\$5.59	HIGH
waterfront homes Sarasota	110/mo	\$1.99	MEDIUM
home builder Bradenton FL	70/mo	\$3.35	HIGH
home builder Venice FL	10/mo	—	HIGH

Scenario / Need Keywords

Buyers who've moved past "who do I hire" to a specific situation or concern. LOW competition = easy wins.

KEYWORD	VOLUME	CPC	COMPETITION
hurricane resistant homes Florida	480/mo	\$3.48	LOW
cost to build a home in Florida	480/mo	\$4.32	LOW
concrete block homes Florida	260/mo	\$1.36	LOW
build on your own lot Florida	10/mo	\$7.50	MEDIUM

OPPORTUNITY GAP

Low Competition + High Intent = Quick Wins

Hurricane-resistant homes (480/mo) and concrete block homes (260/mo) both show LOW advertiser competition. Most custom builders ignore these terms — yet the searcher is deep in the funnel, already thinking about construction method and storm resilience. A single well-optimized page can rank within 60 days.

"best home builder Sarasota"

Limitations & Caveats

Search volumes are 12-month averages and may not reflect real-time demand shifts. CPC values represent current Google Ads auction prices and fluctuate. Keyword difficulty scores are relative (0–100 scale) and should be validated against actual SERP authority profiles. Local Pack rankings are volatile and depend heavily on proximity, GBP completeness, and review velocity.
